

# Chandra Sekhar Mohanty

A passionate programmer with **4+ years** of experience as a Developer as well as Expert devops engineer.

Phone - 7077956599

Email –

[chandramohanty98@gmail.com](mailto:chandramohanty98@gmail.com)

## PROFILE SUMMARY

Experienced devops engineer with proficient knowledge in terraform and ansible. Also worked on chaos testing with different architecture

Have worked on craft CMS project with docker and Kubernetes deployment

Thorough knowledge in monitoring server with Grafana and Prometheus.

Worked on databases like firebase, MySQL and Oracle with a good knowledge in SQL.

Worked on AWS cloud

Worked on a project with chef recipes and created cookbook for some packages.

Desire to learn more and keep up-to-date on technologies.  
Demonstrated effective teamwork and communication skills in complex customer delivery projects.

## WORK EXPERIENCE

### **1- Conso4s, Bengaluru —Devops Engineer**

October 2021 – April 2024

Conso4s is a Software Development Company offering services in .Net, PHP, Java, and more. In conso4s my role is to develop and maintain CI/CD flow and write yml file for pipeline. Basically I worked one deployment , monitoring and maintenance part.

### **2- Tata Consultancy Service (TCS), Bhubaneswar —System Engineer**

April 2024 – PRESENT

DevOps Engineer with experience at TCS in automating CI/CD pipelines, containerization, cloud operations, and improving system reliability. Currently working on Verizon project with site speed and JMeter integration with Jenkins and chaos testing

## TECHNICAL SKILLS

- Cloud - AWS(IAM, EC2,EKS,ECR,OPSWORK, EBS,VPC,ELASTIC CACHE,RDS,and many more).
- Programming language- PHP, Javascript
- Framework- Laravel,vuejs
- Deployment tool - Docker, kubernetes, Elastic Beanstalk,Opswork
- Database - MySql, postgresql
- IDE - VS Code, Sublime Text,VIM
- Version control Tools – git, bitbucket,gitlab
- Configuration Tool – Ansible , chef, Terraform
- Monitoring Tool – Prometheus,Grafana, Datadog
- OS – Linux
- Chaos testing

---

## EDUCATION

- Bachelor in Computer Science and Engineering at TAT (Trident Academy of technology) under BPUT University, Bhubaneswar. (2016-2020)
- Intermediate in Science at Maharishi College Of Natural Law, Bhubaneswar under CHSE Odisha. (2014-2016)

## PERSONAL DETAILS

- Current City – Bhubaneswar, Odisha
- Hometown – Kendrapada, 754214, Odisha
- Marital Status - Unmarried
- DOB – 24 June 1999
- Language - Odia, Hindi, English
- Hobbies -Singing, Travelling

## PROJECTS

### **Pricing genie — A UK sales project- (Current Project)**

**Devops technologies** – opswork , chef , RDS

**Key Role** – deploy the application in prod and change in chef cookbook if external package require.

**Responsibilities** – Now we are working on migration of application into Terraform and ansible .**upgrading the package version through ansible.**

**Project Key Features** – Maintain the maintenance report and send to client. As we have 3 env(dev, uat , prod) , everyday day working on the monitor servers as each env have 6 servers.

### **Kahvay — A UK online tutorial Project- (CurrentProject)**

**Devops technologies** – Elasticbeanstalk, codebuild, codepipeline, github

**Key Role** – setup dev , uat , prod env and maintain all the services.

**Responsibilities** – As per the application it belongs to php and react project .

**Key Role** – Created docker image for craft application and write deployment yaml file for kubernetes.

**Responsibilities** - Involved in the entire process as setup docker configuration for developer and created flow for dev , uat , production environment.

### **Universal extras — A film details site**

**Devops technologies** – Docker-compose , amazon lightsail

**Key Role** - Worked on docker compose file and worked on the access and enable phpadmin in amazon lightsail.

### **Metahactober — A US base event select project from META**

**Devops technologies** - Elastic beanstalk , cloudfront , ALB

**Key Role** – Setup 3 env for development and tested ELB around 1000000 users.

**Responsibilities** - Apart from environment setup the main challenge is to 1000000 users which is solved by auto scaling and ALB.

### **Havio — A Australia based project which based on construction**

**Development technologies** – vuejs , PHP

**Key Role** – working on frontend and backend technologies for a construction site report.

**Responsibilities** – Based on ticket from client we solve it .through spint we solve the issue.

### **Craft — A multiside application (UKbaseProject)**

**Devops technologies** – Docker ,Kubernetes

### **Verizon** — a major US-based telecommunications and digital solutions provider

**Devops technologies** – Jenkins, new relic

**Key Role** – Working on Jenkins CI/CD configuration with JMeter and site Speed. Doing chaos testing for all the application running for Verizon.

Managed CI/CD configuration in Jenkins for **70+ applications**, ensuring automated, reliable, and scalable deployment pipelines.

Performed **chaos testing** on critical applications to validate **resiliency, persistence, and fault-tolerance** during failures.

Built and optimized **Docker files** for selected applications to improve containerization, portability, and deployment efficiency.
