

CHANDRA SEKHAR MOHANTY

DEVOPS & CLOUD INFRASTRUCTURE ENGINEER

Bhubaneswar, Odisha, India | 7077956599 | chandramohanty98@gmail.com

PROFESSIONAL SUMMARY

Experienced DevOps Engineer with 4.8 years of hands-on expertise in architecting highly available cloud infrastructure, automating CI/CD pipelines, and implementing Site Reliability Engineering (SRE) principles. Highly proficient in migrating legacy deployments to modern Infrastructure as Code (IaC) utilizing Terraform and Ansible. Proven ability to engineer AWS auto-scaling environments supporting over 1,000,000 concurrent users. Adept at Kubernetes containerization, rigorous chaos testing for enterprise-grade system resilience, and championing modern 'Shift-Left' DevSecOps and GitOps modernization initiatives.

CORE COMPETENCIES & TECHNICAL SKILLS

Cloud Platforms:	AWS (IAM, EC2, EKS, ECR, OpsWorks, EBS, VPC, ElastiCache, RDS), Amazon Lightsail
Infrastructure as Code (IaC):	Terraform, Ansible, Chef
Containers & Orchestration:	Docker, Docker-compose, Kubernetes (K8s), ArgoCD (GitOps)
CI/CD & Deployment:	Jenkins, AWS CodePipeline, AWS CodeBuild, Elastic Beanstalk, Git, Bitbucket, GitLab, GitHub Actions
Monitoring & Reliability:	Prometheus, Grafana, Datadog, New Relic, Chaos Testing, JMeter
Security & Platform (PoC):	Trivy (Image Scanning), HashiCorp Vault (Secrets), Backstage (IDP)
Languages & Databases:	PHP, JavaScript, SQL MySQL, PostgreSQL, Oracle, Firebase

PROFESSIONAL EXPERIENCE

System Engineer (DevOps) | Tata Consultancy Services (TCS) April 2024 - Present | Bhubaneswar, India

- Enterprise CI/CD Automation:** Managed and optimized CI/CD configurations in Jenkins for over 70+ applications, ensuring automated, reliable, and scalable deployment pipelines for a major US-based telecommunications provider (Verizon).
- GitOps & Platform Engineering Initiatives:** Currently championing a Proof-of-Concept (PoC) to transition legacy push-based Jenkins deployments to a declarative GitOps model utilizing **ArgoCD**. Initiated architectural research into **Backstage** to evaluate the feasibility of an Internal Developer Platform (IDP) to reduce developer onboarding time.
- DevSecOps & 'Shift-Left' Security:** Integrated foundational DevSecOps practices by evaluating **Trivy** for automated container image scanning and researching **HashiCorp Vault** for centralized, dynamic secret management to enhance pipeline security.
- System Resiliency & Chaos Testing:** Performed rigorous chaos testing on critical applications to actively validate system resiliency, persistence, and fault-tolerance during simulated production failures.
- Observability & Container Optimization:** Integrated JMeter and site speed testing into Jenkins pipelines, utilizing New Relic for deep observability and performance tracking. Built, refined, and optimized

Dockerfiles for legacy applications to vastly improve containerization standards, portability, and deployment efficiency.

DevOps Engineer | Conso4s

October 2021 - April 2024 | Bengaluru, India

- **High-Traffic Cloud Architecture (Metahactober):** Designed and provisioned AWS infrastructure (Elastic Beanstalk, CloudFront, ALB) across 3 environments, configuring Auto Scaling to successfully handle load testing for 1,000,000+ users.
- **Infrastructure Modernization (Pricing Genie):** Spearheaded the large-scale migration of application infrastructure from AWS OpsWorks and Chef to modern IaC, utilizing Terraform and Ansible for streamlined package versioning and deployment across Dev, UAT, and Prod environments.
- **Kubernetes Containerization (Craft CMS):** Built custom Docker images and authored comprehensive Kubernetes deployment YAML manifests, creating standardized, automated deployment flows for developers.
- **AI-Augmented Pipeline Development (Kahvay):** Engineered end-to-end CI/CD workflows using GitHub, AWS CodeBuild, and CodePipeline to deploy React and PHP applications seamlessly to Elastic Beanstalk, while exploring AI-augmented **GitHub Actions** workflows for pipeline optimization.
- **FinOps & Server Monitoring:** Monitored high-availability server clusters using Prometheus and Grafana, actively maintaining logs and generating maintenance reports for international clients. Executed routine cloud resource audits to identify idle resources and optimize AWS expenditure.

EDUCATION

Bachelor in Computer Science and Engineering

Trident Academy of Technology (TAT) under BPUT University, Bhubaneswar | 2016 - 2020

Intermediate in Science

Maharishi College Of Natural Law, Bhubaneswar under CHSE Odisha | 2014 - 2016
