

CHANDRA SEKHAR MOHANTY

DEVOPS ENGINEER

Bhubaneswar, Odisha, India | [Phone Number] | [Professional Email]
linkedin.com/in/[YourProfile] | github.com/[YourUsername]

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with **4.8 years** of experience in architecting scalable, highly available cloud infrastructure and automating CI/CD pipelines. Expert in bridging the gap between development and operations to accelerate delivery, enforcing DevSecOps best practices, and implementing Site Reliability Engineering (SRE) principles. Proven track record of **reducing deployment times by up to 80%**, cutting cloud infrastructure costs by **30%+**, and collaborating with cross-functional teams to achieve **99.99% system uptime**.

CORE COMPETENCIES & TECHNICAL SKILLS

Cloud Platforms:	AWS (EKS, EC2, S3, RDS, Lambda, IAM, VPC), Azure, GCP
Infrastructure as Code:	Terraform, AWS CloudFormation, Pulumi
Containers & Orchestration:	Docker, Kubernetes (K8s), Helm, ECS, Fargate
CI/CD & Automation:	Jenkins, GitLab CI, GitHub Actions, ArgoCD, Ansible
Monitoring & Logging:	Prometheus, Grafana, ELK Stack, Datadog, New Relic
Languages & Methodologies:	Python, Bash, Go, SQL SRE, DevSecOps, GitOps

PROFESSIONAL EXPERIENCE

DevOps Engineer | [Current Company Name] [Month, Year] – Present | Bhubaneswar, India / Remote

- Spearheaded Kubernetes Migration:** Architected and executed the migration of legacy monolithic applications to a microservices architecture on AWS EKS, improving system scalability and reducing infrastructure costs by **35%**.
- Optimized CI/CD Pipelines:** Redesigned Jenkins and GitLab CI workflows, introducing parallel execution and automated testing, which reduced average deployment time from **2 hours to 15 minutes**.
- Implemented GitOps & IaC:** Standardized infrastructure provisioning using **Terraform** and **ArgoCD**, ensuring 100% drift detection and enabling one-click disaster recovery across multi-region environments.
- Enhanced System Reliability (SRE):** Deployed Prometheus and Grafana for robust observability, establishing SLIs/SLOs that led to the early detection of anomalies and boosted overall uptime to **99.99%**.

Cloud / DevOps Engineer | [Previous Company Name]

[Month, Year] – [Month, Year] | [Location]

- **Automated Security (DevSecOps):** Integrated SonarQube and Trivy container scanning directly into GitHub Actions pipelines, decreasing critical production vulnerabilities by **60%**.
- **Cloud Infrastructure Management:** Managed and scaled AWS resources supporting a high-traffic platform, ensuring zero downtime during peak loads.
- **Configuration Management:** Developed and maintained 50+ **Ansible** playbooks to automate OS patching, user management, and software installations across Linux servers, saving **15+ hours of manual work weekly**.
- **Database Automation:** Collaborated with DBAs to automate PostgreSQL and MySQL backups and replication to Amazon S3, achieving a Recovery Point Objective (RPO) of less than 5 minutes.

Systems Administrator / IT Support | [Earlier Company Name]

[Month, Year] – [Month, Year] | [Location]

- **Linux Administration:** Administered a mixed environment of RHEL and Ubuntu servers, handling troubleshooting, performance tuning, and access control.
- **Build Automation:** Assisted developers by writing Bash and Python scripts to automate local build environments and testing frameworks.

CERTIFICATIONS

AWS Certified DevOps Engineer – Professional

Amazon Web Services (AWS) | [Year]

HashiCorp Certified: Terraform Associate

HashiCorp | [Year]

EDUCATION

Bachelor of Technology / Science (Update as needed)

[University Name], [City, State] | [Graduation Year]
